

## Company Overview

Radix Security is a cybersecurity defense contractor specializing in the testing, securing, and development of embedded systems critical to the United States Department of Defense (DoD). Our expertise extends across aircraft, ships, weapons systems, vehicles, helicopters, satellites, and critical infrastructure. With a mission to ensure the resilience and security of national defense assets, Radix Security provides innovative solutions, expert training, and comprehensive assessments tailored to the unique needs of the DoD and related industries.

## Core Competencies

- **Embedded Systems Security:** Testing and securing critical systems in aircraft, ships, weapons, vehicles, satellites, and critical infrastructure.
- **Custom Tool Development:** Creating innovative tools to enhance cybersecurity testing capabilities.
- **Penetration Testing and Vulnerability Assessment:** Comprehensive analysis to identify and mitigate risks in embedded systems.
- **Training and Education:** Delivering specialized training programs for DoD personnel to strengthen cybersecurity defenses.
- **System Hardening:** Implementing robust measures to protect embedded systems against sophisticated cyber threats.

## Certifications and Compliance

- Adherence to DoD cybersecurity standards, including NIST 800-171 and CMMC requirements.
- DoD 8570 Certified penetration testers and cybersecurity professionals with extensive experience in defense environments.

## Differentiators

- **Specialized Expertise:** Deep knowledge of embedded systems cybersecurity for military applications, including avionics and weapons systems.
- **Veteran-Owned Leadership:** Founded and led by a former United States Marine with extensive experience in defense and cybersecurity.
- **Innovative Solutions:** Proprietary tools like FAST, designed specifically for the unique challenges of embedded systems.
- **Mission-Focused:** Dedicated to safeguarding critical DoD systems with a proven track record of reliability and precision.
- **Agility and Responsiveness:** A small, highly specialized team capable of rapid deployment and tailored solutions.
